Git Hub

What is?

is a cloud-based service that hosts a version control system

what is it for?

It is widely used by developers to store their works, thus giving millions of people around the world the opportunity to cooperate on them.

How does it work

allows the GIT HUB community to interact and cooperate together with other creators on the same project

How to create a file or upload one in a Repository

On GitHub.com, navigate to the repository home page. In your repository, navigate to the folder where you want to create a file. Above the list of files, select the Add File drop-down menu, and then click Create New File.

- In the top right corner of any page, select and then click New Repository.

- Enter a short, easy-to-remember name for the repository.

- Optionally, you can add a description of the repository.

- Choose the visibility of the repository.
